

BRAND MARKETING KIT + COMPETITOR DEEP-DIVE · APRIL 2026

JTree Health

Complete Brand Marketing Kit · Apex, NC · Adolescent PHP/IOP

WHAT'S IN THIS KIT

PART 1 — Competitor Deep Dive (9 brands · what they do · what they miss · SEO analysis)

PART 2 — Local Market Intelligence (NC Triangle · keyword opportunities · gaps)

PART 3 — Color Palette (Option 3 locked · hex · RGB · usage rules)

PART 4 — Typography System (font pairing · hierarchy · usage)

PART 5 — Logo System (4 lockup concepts · icon direction · motif)

PART 6 — Brand Voice + Messaging (by audience · copy samples)

PART 7 — Website Build Plan (page structure · SEO · content strategy)

PART 8 — Photography + Imagery Direction

PART 9 — Social Media Playbook

PART 10 — Freelancer Briefs (logo · Galactic Fed)

PART 1 Competitor Deep Dive

9 brands fully analyzed — what they do, miss, and what JTree steals

OVERVIEW

Every brand you are competing against or learning from — analyzed completely.

This section covers every brand from your research document. For each one: what they do well, what is missing, what JTree should steal, and their SEO posture. The brands are organized by relevance to JTree — direct NC competitors first, national teen-focused peers second, design inspiration brands third.

DIRECT NC COMPETITORS

 BrightPath Behavioral Health #D4724A Burnt Orange Teens 13–18 · NC parents brightpathbh.com			
WHAT THEY DO WELL Massive location-page SEO — individual pages for every NC city (Charlotte, Durham, Greensboro, Asheville, Fayetteville, Huntersville). PHP + IOP + virtual. PE-backed. CARF accredited. Strong Google reviews. Clear clinical positioning.	WHAT THEY'RE MISSING Rainbow/multicolor brand feels chaotic. Copy is generic and repetitive across city pages. No teen-direct voice — talks AT teens not WITH them. No outcomes data visible. Busy visual design.	WHAT JTREE LEARNS Copy their city-page SEO strategy immediately. Build pages for: Apex, Cary, Chapel Hill, Raleigh, Durham, Wake Forest, Morrisville, Holly Springs. This is their #1 traffic driver.	SEO NOTES Dominates "teen mental health [NC city]" queries. Ranks for PHP and IOP terms across the Triangle. Templated city pages are their moat. You must build equivalent pages from day 1.

NATIONAL TEEN-FOCUSED PEERS (design + strategy reference)

Charlie Health

#1A2F5A Deep Navy

Teens + Adults · Virtual-only · National **SEO: Strong**

charliehealth.com

WHAT THEY DO WELL

Outcomes page with specific data (83% reduction in depression). Strong referral partnerships page. Clear insurance page. Bold "most trusted IOP" positioning. Partnerships tab for B2B referrals.

WHAT THEY'RE MISSING

Virtual only — no physical clinic differentiation. Deep navy feels corporate. No location specificity for local parents. No teen-direct voice on the site.

WHAT JTREE LEARNS

Steal: Outcomes page with hard numbers. Referral partnerships page for school counselors and pediatricians. Bold positioning claim in hero headline.

SEO NOTES

Ranks nationally for "intensive outpatient program teens." Content marketing heavy. Outcomes page earns backlinks from healthcare directories.

Embark Behavioral Health

#3A6828 Earthy Olive

Teens · Residential + IOP · National **SEO: Strong**

embarkbh.com

WHAT THEY DO WELL

Multi-color geometric logo is iconic. Clear step-down care model explained. Outcomes-forward marketing. Strong PR — \$400M acquisition at 14x multiple. National scale.

WHAT THEY'RE MISSING

Wilderness/residential aesthetic does not translate to local outpatient. Multicolor logo is energetic but not calm. No local NC presence.

WHAT JTREE LEARNS

Steal: Step-down care explanation (PHP → IOP → outpatient). Framing the care continuum for parents who fear residential placement.

SEO NOTES

Strong domain authority from national PR. Ranks for residential terms. Not a direct local SEO competitor.

Handspring Health

#1A9A7A Teal Green

Children + Teens · Outpatient · National **SEO: Medium**

handspringhealth.com

WHAT THEY DO WELL

Excellent site functionality — clean nav, fast admissions CTA, separate tracks for parents vs. partners vs. payers. Circular outcome stats (96%, 84%) are visual and compelling. Good pediatrician referral page.

WHAT THEY'RE MISSING

Colors are pediatric-forward (teal + yellow) — feels more K-8 than teen-focused. No specific PHP program. No outcomes page with clinical detail.

WHAT JTREE LEARNS

Steal: Three-audience navigation (For Families / For Partners / For Payers). Circular stat visualizations. Dedicated pediatrician referral page.

SEO NOTES

Good SEO on therapy and counseling terms. Not ranking for IOP/PHP specifically. Medium authority.

Hazel Health

#4A6AAA Purple-Blue

K-12 School-based · District-level · National SEO: Strong

hazel.co

WHAT THEY DO WELL

School district search tool is brilliant UX. Clear B2B2C model (districts buy, families use). Trustpilot badge drives social proof. Clean sans-serif brand.

WHAT THEY'RE MISSING

Completely different audience (school-contracted, not family-direct). No PHP/IOP. Not a behavioral health clinic.

WHAT JTREE LEARNS

Steal: Trustpilot or Google Reviews badge prominently in hero. School counselor referral pathway. Simple hero CTA with immediate action.

SEO NOTES

Ranks strongly for school health terms. Not competing for IOP/PHP keywords.

Salma Health

#C8BC9A Cream/Beige

Adults · IOP PHP · Multi-state SEO: Weak

salmahealth.com

WHAT THEY DO WELL

Beautiful minimalist design — ultra-clean cream and white interiors, embossed logo, warm photography. Premium clinical spa aesthetic. Very calming.

WHAT THEY'RE MISSING

Near-invisible brand color — cream on white. Adult only — does not speak to teens or parents of teens. Minimal SEO investment. No prominent outcomes data.

WHAT JTREE LEARNS

Steal: Interior photography showing a calm clinic environment (not clinical white walls). The "show the space" approach builds parent trust.

SEO NOTES

Very low SEO investment. Minimal keyword rankings. Not a competitive threat but shows what minimal SEO looks like.

DESIGN INSPIRATION BRANDS (not direct competitors)

allcove

#9A80CC Soft Purple

Youth 12-25 · Community-based · CA nonprofit SEO: Medium

allcove.org

WHAT THEY DO WELL

The aesthetic JTree aspires to: modern, clean, Gen Z-resonant, immediately says what it is. Organic blob photo treatments. Monospace typewriter font for quotes. Multilingual. Youth-co-designed. Soft lavender/pink/green gradients.

WHAT THEY'RE MISSING

CA nonprofit — not a clinical program. No PHP/IOP. No insurance. Not replicable as a for-profit behavioral health brand without adaptation.

WHAT JTREE LEARNS

Steal: The "today I want to..." interactive question format. Organic blob photo frames (photos cut into organic shapes, not rectangles). Monospace font for teen quotes. The emotional tone: calm, seen, not judged.

SEO NOTES

Nonprofit SEO — not optimized for clinical terms. Irrelevant for keyword strategy but excellent design reference.

Eleanor Health

#2A2A9A Dark Blue-Purple

Adults · SUD · Virtual · Multi-state

SEO: Strong

eleanorhealth.com

WHAT THEY DO WELL

The swirl illustration motif across every page creates strong visual identity without a complex logo. Lowercase wordmark is warm and human. Outcomes circles (82%, 83%, 77%) are visually compelling. Strong CARF accreditation display.

WHAT THEY'RE MISSING

Adult SUD focus — not teens. Blue-purple palette does not differentiate from Charlie Health. Illustrations are colorful but busy on some pages.

WHAT JTREE LEARNS

Steal: Outcomes in circular graphic format. The design motif concept (swirls for Eleanor = spikes for JTree). Lowercase wordmark warmth. CARF badge in footer. "For Partners" referral pathway.

SEO NOTES

Strong domain authority from PR and multi-state expansion. Ranks nationally for SUD terms. Good content marketing model.

Bluebird Kids Health

#F5C020 Bold Yellow

Pediatric primary care · Ages 0-18

SEO: Medium

bluebirdkids.com

WHAT THEY DO WELL

The B-as-bird dual-meaning logo is clever — letter becomes icon. Yellow hero background is bold and memorable. Clear location-first navigation. "Same-day sick visits" value prop in first sentence.

WHAT THEY'RE MISSING

Pediatric primary care, not behavioral health. Yellow dominant = energetic not calming. Wrong audience entirely.

WHAT JTREE LEARNS

Steal: The dual-meaning letterform logo concept (their B becomes a bird — JTree's J becomes a tree trunk). Location-first nav with clinic finder.

SEO NOTES

Local SEO dominant in FL markets. Location pages strategy similar to BrightPath. Not a behavioral health competitor.

Sero Mental Health

#2A6888 Steel Blue-Teal

Adults · SUD · Beach locations · Multi-state

SEO: Medium

seromentalhealth.com

WHAT THEY DO WELL

The wave motif as brand character — layered sage/sand/teal waves that reference their beach clinic locations. Very calming palette. "there is no health without mental health" headline is memorable.

WHAT THEY'RE MISSING

Adult SUD only. Muted/washed-out palette — less distinctive than it looks in isolation. Wave motif is contextual (beach) not universal.

WHAT JTREE LEARNS

Steal: The brand character motif concept (their waves = JTree's spikes). The restrained, muted secondary palette as contrast to a bold primary. Simple declarative hero headline.

SEO NOTES

Medium SEO investment. Not ranking for teen or local NC terms. Referral model not well-developed online.

The single biggest insight from this analysis: BrightPath wins on SEO because of city-specific pages. Charlie Health wins nationally on content and outcomes data. allcove wins on Gen Z emotional resonance. Eleanor wins on design motif. Handspring wins on navigation clarity. JTree must borrow all five strategies and combine them — local SEO dominance + outcomes data + teen emotional voice + spike motif + clean UX. No competitor is doing all five. That is the gap.

PART 2 Local Market Intelligence + SEO Strategy

NC Triangle keyword map · what to own · content plan

THE NC TRIANGLE SEO OPPORTUNITY

Parents search locally. JTree must own every Triangle city.

Parents searching for teen mental health care do NOT search "best IOP nationally." They search "teen IOP Apex NC" or "adolescent PHP near Cary." BrightPath has already built this city-page infrastructure for Wake Forest, Raleigh, Durham, Charlotte, etc. JTree must build an equivalent set immediately — these pages are the single highest-ROI SEO investment available.

PRIORITY KEYWORD TARGETS

KEYWORD / SEARCH TERM	MONTHLY SEARCHES	DIFFICULTY	PRIORITY
Teen mental health treatment Apex NC	50–200/mo	Low	High
Adolescent IOP Cary NC	50–200/mo	Low	High
Teen PHP program Raleigh NC	100–500/mo	Low	High
Teen intensive outpatient Chapel Hill	50–200/mo	Low	High

Adolescent partial hospitalization Triangle NC	50–200/mo	Low	High
Teen IOP after school Apex	20–50/mo	Low	High
Mental health program for teens near me NC	500–1K/mo	Med	High
Teen PHP IOP North Carolina	200–500/mo	Med	High
Adolescent outpatient mental health NC	200–500/mo	Med	High
Does BCBS cover teen IOP NC	50–200/mo	Low	High
Does Cigna cover teen PHP NC	50–200/mo	Low	Medium

Teen anxiety treatment Apex NC	50–200/mo	Low	High
Teen depression program Raleigh	100–500/mo	Low	High
Teen OCD treatment NC	50–200/mo	Low	Medium
ADHD treatment teens Cary NC	50–200/mo	Low	Medium
Adolescent PHP vs IOP difference	200–500/mo	Low	Medium
Teen mental health programs Wake County	100–500/mo	Low	Medium
School counselor refer teen IOP NC	20–50/mo	Low	Medium
Teen mental health crisis NC resources	200–500/mo	Med	Medium

CITY PAGES — BUILD THESE ON DAY 1

CITY	COUNTY	WHY IT MATTERS	PAGE URL TO BUILD
Apex	Wake	Your clinic location. Must own this completely.	jtreehealth.com/locations/apex-nc
Cary	Wake	Largest Wake Co. city. Huge parent population, affluent.	jtreehealth.com/locations/cary-nc
Chapel Hill	Orange	UNC families, highly educated parents, progressive.	jtreehealth.com/locations/chapel-hill-nc
Durham	Durham	Large, diverse, fast-growing. Strong referral base.	jtreehealth.com/locations/durham-nc
Raleigh	Wake	State capital. Largest search volume in Triangle.	jtreehealth.com/locations/raleigh-nc
Morrisville	Wake	Research Triangle Park. Tech families. High income.	jtreehealth.com/locations/morrisville-nc
Wake Forest	Wake	BrightPath's home city. Intercept their traffic here.	jtreehealth.com/locations/wake-forest-nc
Holly Springs	Wake	Fast-growing suburb. Young families. Low competition.	jtreehealth.com/locations/holly-springs-nc
Pittsboro	Chatham	Chatham Park development. Growing fast. No competition.	jtreehealth.com/locations/pittsboro-nc
Carrboro	Orange	Adjacent to Chapel Hill. UNC adjacent. Progressive.	jtreehealth.com/locations/carrboro-nc

E-E-A-T — CRITICAL FOR HEALTH CONTENT SEO

SIGNAL	WHAT IT IS	HOW JTREE BUILDS IT
Experience	Real-world experience with the topic	Founder story (Gaby's personal connection). Staff bio pages with photos. Patient testimonials

Expertise	Clinical knowledge and credentials	Cathy's credentials prominent. Clinical team bios. CARF accreditation badge. Evidence-based
Authoritativeness	Recognition from other authorities	AMP seal. Insurance in-network logos (BCBS, Cigna, UHC, Aetna). Psychology Today listing
Trustworthiness	Accuracy, transparency, safety	Privacy policy. Insurance verification form. Crisis resources on every page. Phone number in h

PART 3

Color Palette — Option 3 (Locked)

Forest · Deep Sage · Digital Lavender · Cyber Lime · Warm Sand

ANCHOR	PRIMARY	GEN Z CALM	GEN Z ENERGY	SECONDARY	BG	TEXT
Forest #1E3D34 CTA / footer	Deep Sage #2C5F52 Logo / nav / H1	Dig. Lavender #A89FD8 Teen sections	Cyber Lime #B8E04A Badges / accents	Mist Sage #8FBFB0 Cards / fills	Warm Sand #F5F0E8 All backgrounds	Charcoal #2A2A2A All body text

WHY OPTION 3 WINS AGAINST EVERY COMPETITOR

COLOR	NOT USED BY	WHY IT WINS
Forest #1E3D34	Anyone in NC teen behavioral health	Darkest rich green = clinical authority for parents. Zero competitor uses this
Deep Sage #2C5F52	Anyone as primary color (BrightPath)	Uses lighter, sage as a wall. Represents trustworthiness. Completely unclaimed
Digital Lavender #A89FD8	No teen behavioral health brand in WCSM Gen Z	Color. Calm, inclusive, gender-neutral. Directly signals mental health
Cyber Lime #B8E04A	No competitor in the space	Mental health awareness ribbon color. Energetic without being orange. Teen
Warm Sand #F5F0E8	Salma uses a lighter cream – theirs	Warm and clean. Invites without overwhelming. Completely different

PART 4

Typography System

Nunito + Plus Jakarta Sans · Eleanor-inspired · free on Google Fonts

FONT SYSTEM — ELEANOR-INSPIRED, JT-ADAPTED

Nunito for wordmark/headlines. Plus Jakarta Sans for body. Both free.

You said you want Eleanor's font aesthetic. Eleanor uses a rounded geometric sans-serif wordmark — warm, approachable, all-lowercase feeling even in mixed case. Nunito is the closest free equivalent: rounded terminals, friendly letterforms, works beautifully at display sizes. Plus Jakarta Sans for body is modern, geometric, highly legible on mobile. Both are on Google Fonts, load fast, zero cost.

LEVEL	FONT	SIZE · WEIGHT	USE FOR	SAMPLE
-------	------	---------------	---------	--------

DISPLAY	Nunito	56–80px · Bold 700	Hero section only — max impact w	Getting better starts here.
H1	Nunito	32–44px · Bold 700	Page titles, section heroes	Teen Mental Health, Apex NC
H2	Nunito	24–30px · SemiBold 600	Major section headings	How Our Programs Work
H3	Plus Jakarta Sans	18–22px · SemiBold 600	Subsection titles, card headers	What to Expect at JTree
BODY	Plus Jakarta Sans	16px · Regular 400	All paragraph copy	We provide structured care...
SMALL	Plus Jakarta Sans	13px · Regular 400	Captions, footnotes, disclaimers	Insurance verification required
LABEL	Plus Jakarta Sans	10–11px · Bold 700	Eyebrows, badges, nav labels	PHP PROGRAM · AGES 10–17
CTA BUTTON	Plus Jakarta Sans	14–16px · SemiBold 600	All button text	Start Admissions Process →

Google Fonts install links:

Nunito: fonts.google.com/specimen/Nunito — download and install all weights

Plus Jakarta Sans: fonts.google.com/specimen/Plus+Jakarta+Sans — download and install all weights

For Canva users: Both fonts are available in Canva Pro. Search exact names in the font picker.

For your website: Add via Google Fonts embed code in your site header. Import Nunito (weights 400,600,700,800) and Plus Jakarta Sans (weights 400,500,600,700).

PART 5

Logo System + Design Motif

Joshua Tree spike · 4 lockup concepts · the JTree brand character

LOGO DIRECTION — CONFIRMED CONCEPT

Concept 1 (horizontal) primary. Concept 5 (J-as-trunk) as alternate hero mark.

From the 8 logo concepts presented, the recommended primary lockup is Concept 1 — horizontal, geometric Joshua Tree icon left + Nunito wordmark right. For hero use on the website and clinic wall, Concept 5 (tree branches growing directly from the top of the letter J) is distinctive and fully ownable. The freelancer brief in Part 10 specifies exactly what to build.

LOCKUP	USE CASE	BACKGROUND	FORMAT NEEDED
A — Horizontal (primary)	Website header, email signature, letterhead, business cards	White, Sans or white	AI + SVG + PNG transparent
B — Reversed (dark)	Investor decks, dark slide covers, clinic entrance signage	Forest #1E4D49	AI + SVG + PNG white
C — Stacked vertical	Social profile photos, app icon, square format	White or Forest	AI + SVG + PNG (both versions)
D — Icon/submark only	Favicon (16px), embroidery, small context only	Any	SVG + PNG + ICO (favicon)
E — Wordmark only (no icon)	Body of slide decks, fine print contexts	Any	SVG + PNG transparent

THE JTREE SPIKE MOTIF — YOUR BRAND CHARACTER

As Sero has waves, Eleanor has swirls, BrightPath has rainbow ribbons — JTree has the Joshua Tree spike. Geometric line-art fronds, repeating at low opacity across page backgrounds, slide deck textures, and clinic walls. Forest green trees with occasional Cyber Lime accent fronds. This motif is requested in the logo freelancer brief as a separate vector deliverable.

SURFACE	OPACITY / DENSITY	COLOR
Website hero background	12–18% opacity	Forest green on Warm Sand
Slide deck cover background	25–35% opacity	Forest green + 1–2 Lime accent fronds
Slide deck body slides	6–10% opacity	Forest green on Warm Sand (very subtle)
Clinic wall mural	100% — full color decorative	Forest green + Cyber Lime on Warm Sand
Email footer divider	40% opacity — single tree motif	Mist Sage on white
Social media graphics	Single large tree as graphic element	Deep Sage on Sand or Lime on Forest
Business card edge	Border of micro spikes left side	Forest green or Mist Sage

PART 6 Brand Voice + Messaging

3 audiences · tone guides · sample copy · words to use and avoid

BRAND POSITIONING STATEMENT

JTree Health is the Triangle's adolescent mental health program for families who need more than weekly therapy but want to keep their teen at home. We offer PHP and IOP for teens ages 10–17 in Apex, NC — structured, insurance-covered, after-school. Like the Joshua Tree, which survives and thrives in the harshest conditions, we build the resilience in your teen that lasts.

VOICE BY AUDIENCE

TO PARENTS	TO TEENS	TO REFERRAL SOURCES
Calm. Credible. Clear. You are the expert in the room. Explain PHP and IOP plainly — most parents have never heard these terms. Address insurance directly. Show outcomes. Acknowledge the fear of "is this bad enough to need this?" Answer: yes. That fear is normal. Tone: A trusted clinician at 11pm answering the Google search a worried parent just typed.	Real. Not scary. Non-clinical. No jargon. Don't say "healing journey." Don't say "safe space." Say: this is a group of teens going through what you're going through. Coming here doesn't mean something is broken. It means you're doing something about it. Tone: An older sibling who's been through it and is being straight.	Professional. Efficient. Data-backed. Make it easy to refer. Lead with census openings and step-down availability. Confirm insurance and admissions speed. Show clinical modalities (DBT, CBT, ACT). Offer a warm handoff process. Tone: A clinical peer, not a sales pitch.

SAMPLE HERO HEADLINES — TEST THESE

FOR PARENTS	Your teen deserves more than weekly therapy. JTree Health offers PHP and IOP in Apex, NC — structured, aft
FOR PARENTS	Something is wrong. You can feel it. JTree Health provides the structured support your teen needs, without leav
FOR TEENS	You're not broken. You're overwhelmed. JTree Health is a group of teens doing the work to feel better — 3 day
FOR TEENS	Getting help isn't a big deal. Not getting help is. JTree Health, Apex NC.
UNIVERSAL	The Triangle's adolescent mental health program. PHP and IOP for teens 10–17, in Apex, NC.

PART 7 Website Build Plan

Page structure · content per page · SEO · build sequence

RECOMMENDED PLATFORM: WEBFLOW OR SQUARESPACE

Since you're building yourself: Squarespace is fastest to launch (templates, no code). Webflow gives more design control and better SEO tooling but has a learning curve. Both support custom domains and Google Analytics. Avoid WordPress for a solo build — too much maintenance overhead. Framer is an option if you want the most modern design control. Recommendation: Squarespace to launch fast, migrate to Webflow in 6 months when you have resources.

SITE MAP — BUILD IN THIS ORDER

PRIORITY	PAGE	URL	PRIMARY PURPOSE	KEY CONTENT
1 — Launch	Home	/	Convert parents. First impression	Hero headline, PHP/IOP explainer, insurance logos, CTA, outcomes
1 — Launch	PHP Program	/programs/php	Parents researching PHP specifically	What PHP is, daily schedule, who it's for, step-down to IOP
1 — Launch	IOP Program	/programs/iop	Parents researching IOP specifically	What IOP is, after-school schedule, who it's for, step up from outpatient
1 — Launch	Admissions	/admissions	Start the intake process	3-step process, insurance verification form, what to expect, FAQ
1 — Launch	Insurance	/insurance	Parent question: will this be covered?	BOBC, Cigna, Aetna, UHC, Tricare logos + explanations
1 — Launch	About / Our Story	/about	Build trust. Gaby's story. Josh's story	Founder narrative, team bios (Caitlyn, clinical staff), CARF seal
2 — Month 1	For Teens	/for-teens	Teen-direct page. Different tone	Written by teens, not parents. Real talk. What to expect at JTree.
2 — Month 1	For Referrers	/referrals	School counselors, pediatricians	What hospital process, census availability, clinical team fax/email
2 — Month 1	Conditions Treated	/conditions	SEO — condition-specific pages	Anxiety, depression, OCD, ADHD, self-harm, trauma — individual pa
2 — Month 1	Location — Apex	/locations/apex-nc	Local SEO — primary city	Directions, parking, maps, what the clinic looks like, local flavor
3 — Month 2+	Location pages (×9)	/locations/[city]-nc	Local SEO — each Triangle city	Templated: city + JTree + PHP/IOP + how to get there
3 — Month 2+	Blog	/blog	Content marketing + SEO	Condition guides, parent resources, teen-direct posts, NC mental hea
3 — Month 2+	Resources	/resources	Value for referrers and parents	Downloads, crisis hotlines, school resources, insurance guides

PART 8

Photography + Imagery Direction

Art direction · what to shoot · what to avoid · AI image use

CATEGORY	SHOW THIS	NEVER SHOW THIS
Teen portraits	Real teens in natural light — reading, talking, outdoors. Gender-neutral.	Stock photos, smiles, glamorized teens, children (too young), adults posing as teens.
Clinic space	Warm interior: wood tones, plants, good lighting, comfortable.	Clinical white walls, fluorescent lighting, institutional furniture, empty rooms.
Parents	Parent + teen together (not posed). A parent in a car, on a phone, etc.	Staged family photoshoots, racially monolithic imagery, perfect nuclear families.
Staff	Caitlyn and clinical team — approachable, professional healthcare workers.	White lab coats, overly formal, looking at clipboards over a patient.
Hero images	Natural light, outdoor NC settings (trees, warm sky). all-over-the-top.	Generic hospital imagery, dark moody photography. Any imagery that is not authentic.

AI-generated images for the blog: Yes — both Handspring and Eleanor use AI-generated images for blog posts. This is now standard practice in behavioral health content marketing. Use Midjourney or Adobe Firefly. Prompt style: "warm natural light, diverse teenager, reading/journaling/talking, organic warm tones, photorealistic, not stock photo, editorial quality." Avoid any AI imagery that looks clinical, crisis-oriented, or stereotyped. For hero and about-page imagery, use real photography.

PART 9

Social Media Playbook

Platform strategy · content types · posting cadence

PLATFORM	PRIMARY AUDIENCE	CONTENT STRATEGY	CADENCE	TONE
Instagram	Parents of teens + teens 15–18	Real clinic moments, staff introductions, parent tip reels, teen voice.	3–4x/week	Warm, relatable, educational, with a subtle motif background.
TikTok	Teens 13–17	Short educational videos: "what IOP actually looks like," "5 signs your teen might be struggling with mental health."	2–3x/week	Real, relatable, and helpful.
LinkedIn	Referrers: school counselors, pediatricians, hospital social workers, etc.	Openings: "Baby as though you're a professional." Data-driven health policy.	2x/week	Professional, data-driven.
Facebook	Parents 35–55	Longer educational posts, parent community resources.	2x/week	Supportive, informative.
Google Business Profile	Parents searching locally	Reviews management, Q&A, hours, photos of clinic space.	At least weekly post	Factual, warm.

PART 10

Freelancer Briefs

Ready-to-post logo brief + website developer brief

LOGO + MOTIF FREELANCER BRIEF — POST ON FIVERR OR 99DESIGNS

PROJECT	Logo design + brand motif vector for JTree Health. Budget: \$400–600 USD. Timeline: 5–7 business days.
---------	--

WHAT WE DO	Adolescent mental health PHP (Partial Hospitalization) and IOP (Intensive Outpatient) clinic. Ages 10–17. Apex, NC. Scaling to multi-site NC platform.
NAME MEANING	JTree = Joshua Tree. A desert plant that survives harsh conditions and still thrives — the metaphor for our teens. Also a tribute to the founder's late brother Josh.
ICON	A simplified, geometric Joshua Tree silhouette. Line-art style — NOT detailed botanical. Should work at 16px favicon AND 3-foot clinic wall. Geometric, architectural, clean. Reference: search "Joshua Tree minimal geometric line art" — that aesthetic.
WORDMARK FONT	Nunito Bold. Clean, rounded, warm. Already selected — use this exact font for the wordmark text.
PALETTE	Primary: Deep Sage #2C5F52. Dark: Forest #1E3D34. Lavender accent: #A89FD8 (very subtle in logo). Lime accent: Cyber Lime #B8E04A (1–2 frond tips only). Background: Warm Sand #F5F0E8.
DELIVERABLES	(1) Primary horizontal lockup — icon + wordmark. (2) Stacked vertical lockup. (3) Icon submark only. (4) Reversed — white/cream on Forest. (5) Wordmark only version. (6) JTree spike motif as repeating vector pattern (like Sero's waves). Files: AI editable + SVG + PNG transparent + PDF. Bonus: 1-page usage guide.
AVOID	Our direct NC competitor BrightPath BH uses burnt orange + rainbow swirl + teal blue. Avoid ALL of those. Also avoid: brains, hearts, sunrises, hands, butterfly, rainbow colors, any clinical imagery.

WEBSITE DEVELOPER BRIEF (if you hire someone to build in Webflow/Squarespace)

Project: Website design and build for JTree Health (jtreehealth.com). Adolescent mental health clinic, Apex NC. Pages needed at launch: Home, PHP Program, IOP Program, Admissions, Insurance, About. Phase 2: For Teens, For Referrers, Conditions Treated, 10 city location pages, Blog.

Platform: Squarespace (preferred for speed) or Webflow.

Colors: Forest #1E3D34 · Deep Sage #2C5F52 · Digital Lavender #A89FD8 · Cyber Lime #B8E04A (sparingly) · Mist Sage #8FBFB0 · Warm Sand #F5F0E8 background · Charcoal #2A2A2A text.

Fonts (Google Fonts): Nunito Bold/SemiBold for headlines and wordmark. Plus Jakarta Sans Regular/Medium/SemiBold for body and UI.

Design feel: allcove.org aesthetic (calm, modern, Gen Z-resonant) combined with clinical credibility. Organic blob photo frames. JTree spike motif as background texture at low opacity. Warm Sand backgrounds throughout. No pure white pages. No rainbow colors.

Key features needed: Insurance verification form (Admissions page). Phone number click-to-call in header. Crisis resources in footer. Google Analytics 4 + Google Tag Manager. Schema markup for local business. Mobile-first responsive. Fast load time (under 2.5s on mobile).

Logo files provided: After freelancer completes (ETA 3 weeks). Phase 1 can proceed with placeholder wordmark.

JTree Health · Full Brand Marketing Kit · April 2026
